Cookies on ADMISI

Our website uses cookies. A cookie is a small file of letters and numbers that we send to your computer to allow us to collect standard internet log information and visitor behaviour information in an anonymous form.

The cookies we use are 'analytical' cookies. They allow us to recognise and count the number of visitors to see how visitors move around the site when using it. This helps us to improve the way our website works, for example by making sure users are finding what they need easily. We gather similar information about site usage from log files. We do not use cookies or log files to personally identify information about you. If you wish to restrict or block the cookies that are used you can do this through your internet browser settings.
