## Short-Dated New Crop options (SDNC)

Enhance risk management, hedging flexibility, and trading opportunities with Short-Dated New Crop options, a cost-effective way to take positions around key economic events in the growing season.

**SCAN TO LEARN MORE**

Neither futures trading nor swaps trading are suitable for all investors, and each involves the risk of loss. Swaps trading should only be undertaken by investors who are Eligible Contract Participants (ECPs) within the meaning of Section 1a(18) of the Commodity Exchange Act. Futures and swaps each are leveraged investments and, because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for either a futures or swaps position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyles and only a portion of those funds should be devoted to any one trade because traders cannot expect to profit on every trade.

CQG

# One for all. All for traders.

Traders, analysts, brokers and bankers.  
Hitters, takers and candlestick makers.

## Global Connectivity

Access exchanges around the world for both market data and trading. Our ultra-secure, high-speed, consolidated market data feeds deliver real-time and historical data from over seventy-five global sources. Life of contract data included.

## Pro Trading Features

Trade global markets with confidence and efficiency. Set up CQG One's trading interfaces to match your trading style. Our trading interfaces offer features specific to the professional trader's requirements including single-click trading from the price scale, Market-by-Order/Detailed DOM, server-side smart orders, and CQG Algos.

## Pro can mean easy-to-use

You will quickly see how intuitive our platform is to use, configure, and deploy. From user provisioning, to building and sharing portfolios, window linking, and drag and drop tabs. CQG One makes trading workflow comfortable and efficient. Less time in setup, more time in the markets.

## Modern Graphics and Analytics

Charts are a trader's visual portal to the price movements of the markets. CQG's graphics have always set the standard and CQG One continues that tradition. We offer traders a large number of chart types, all with easy-to-use features.

CQG One builds on the success of CQG Desktop. All future advanced charting and analytics, innovative trade routing functionality and more will be available in CQG One.

## CQG Algos: Trade Optimally

Ever evolving technological advances in electronic trading present us with unique opportunities and distinct challenges. Capitalize on these and gain better control of your trading strategies with CQG Algos.

Market participants looking to execute large volumes of orders also endeavor to get the best price available in their market. The best price available can be nebulous: Is it attained by aggressively paying up for an immediate fill or by working the order over time? At the risk of the market slipping away, either is an option, but there is a better solution.

The above challenges led to the evolution of a new technology and tools to execute large orders: CQG Algos.

## Browser or Install

Our lightning fast HTML5 means easy access to the markets from anywhere, anytime. Updates with new functionality happens seamlessly over the air in off-trading hours. For institutional customers, a windows installed version will be available for IT compliance.

## Award-Winning Customer Support

Our award-winning customer support teams operate from ten locations across the globe and strive to exceed customer expectations twenty-four hours a day.

Our customer support is backed by product development staff in six countries, our product specialists, and our data quality and operations teams.

# Make stronger commodity market decisions

with real-time global data, ag news, and more

In today's volatile, interconnected markets, it's increasingly difficult to move between micro and macro levels. Adding to the challenge is the worldwide rise in extreme conditions like droughts, impacting production and supply. Finding valuable opportunities requires robust, timely trading data and trustworthy agriculture and weather insights.

Get it all with DTN ProphetX® — including coveted Dalian Commodity Exchange data, for real-time insights into the dynamic Chinese market. It also offers an ever-growing bank of non-exchange data, robust analytical tools, world-class support, and more.

- Anti-Money Laundering
- Ethics
- Cybersecurity
- Customer Funds Protection
- Identity Theft

**“IF YOU THINK COMPLIANCE IS EXPENSIVE,  
TRY NON-COMPLIANCE”**

Paul McNulty, former U.S. Attorney General

As the futures markets evolve, an effective compliance program should do the same. New rules and regulations are established for good reason...to protect the integrity of the markets and to protect the customers you serve. Your regulators aim to safeguard the integrity of the derivatives markets, protect investors, and ensure each member in the industry meets their regulatory responsibilities. Your approach to compliance should be treated with the same level of detail and respect you give to other parts of your business.

Robert DeMuria and Joseph Mazza have over 35 years of experience in the futures industry. Both entered the industry where it counts the most...as compliance professionals with National Futures Association. CSI and its dedicated staff have been providing the futures industry with quality service since 1994.
