=====

Friday a cattle in IA/MN sold from \$184.00 to \$187.00. Nebraska sold at a discount to Iowa/Minnesota at \$184.00 Dressed prices were 292.00 to 295.00 averaging 249.06. The Southwest was at \$178.00 to \$179.00

Kill was up 10,000 head compared to last week but it remains light at 626,000. Next week is Labor Day. Packers will have a small kill this week and won't need to be big buyers for next week. Packers could use this week to have a light kill, just to keep cattle back to add some weight to cattle.

August Live Cattle settled Friday at \$180.67. The 5 day average negotiated steer price is \$185.17. There have been no deliveries for August Live Cattle.

Steer and heifer weights are moving up. Over the past two weeks the average carcass weights are up 9.2 pounds. But much has to do with light movement on showlist cattle in the Southwest so more heavier cattle in the Midwest are going to slaughter so weight balance is skewed and tilted to more cattle in the Midwest.

NATIONAL DAILY DIRECT CATTLE 5 DAY ACCUMULATED WEIGHTED AVERAGES – Steer prices and steer weights*

=====

Cattle futures were higher this week with boxed beef higher and moving higher after a friendly Cattle on Feed Report. Time will tell if higher boxed beef was due to last minute buying for Labor Day or due to falling cattle numbers.

EXPORTS

Beef exports have been consistently going down in 2023. As of June, beef exports are down 11%. Loosing beef exports to Brazil and Australia is one reason. Another reason, the U.S. is not producing the number of Choice and Prime cattle that export buyers want to buy from the U.S. Export buyers can buy low grade beef and beef not fed grains from many countries. Export buyers have bought U.S. beef and paid high prices for it not only because it is high grading but the US had more cattle numbers and is trying to compete with countries producing more high grading cattle.

Exporters want the best beef from the U.S. It does help exports that exporters want offal, feet, hooves, tails and other meats we don't use in the U.S.

The biological lag on cattle is long, and unfortunately for the US cattle industry Brazil and Australia are now and will produce more Choice and Prime cattle.

=====

For week ending August 17, 2023 beef net sale exports were 11,400 MT. South Korea was the biggest buyer taking 4,200MT, Japan was second with 2300MT and Hong Kong took 1300MT with China down to 1000 MT.

Week Ending August 10 , 2023 15,100 MT

=====

Pork prices were higher Thursday on light movement, but on morning sales Friday, movement increased and pork prices tumbled. Thursday total movement for morning and afternoon sales totaled 223.82 loads. Friday morning sales were 213.82 loads.

Early Friday spec traders moved Lean Hogs higher and with the lead month October Lean Hogs, spec traders have an easier opportunities to move markets. But when morning pork prices were released and the daily pork carcass was down \$10.55, loins down \$3.55, Hams falling \$4.70 and Bellies down \$53.78, traders needed to liquidate the early move higher on Lean Hogs. There should be some reality to futures and cash.

Also, Hog slaughter for the week was 2,500,000 head, up 86,000 for the week and year to date up 1,102,000 head.

Negative for packer margins the difference between the CME Pork Index and the CME Lean Hog Index narrowed. A week ago the difference had the Pork Index \$8.29 over Lean Hogs. This week it was \$7.13.

This week it was noticeable that hog movement was lighter due to extreme heat. Weights continue to be low, but as temperatures move back to normal movement, it is likely to increase kill and weights.

=====

EXPORTS

Strong week for pork exports for week ending August 17th at 33,000 MT. Mexico doubled last week's number with 18,000 MT, South Korea took 5800 MT, Columbia was third at 3300 MT and Jaan took 1800 MT China was absent.
