

EXCHANGE FOR RELATED POSITIONS (VERSUS CASH) ACKNOWLEDGEMENT

An Exchange for Related Position (“EFRP”) transaction is governed by the rules and regulations of the exchange(s) listing the product. Before engaging in EFRPs, ADMIS customer (“customer”) and broker responsible for introducing the customer to ADMIS (“broker”) should carefully review the rules and regulations of the exchange(s) listing the product(s) the customer intends to trade.

Definitions

Exchange for Physical (“EFP”) – A privately negotiated and simultaneous exchange of an Exchange futures position for a corresponding cash position.

Exchange for Risk (“EFR”) – A privately negotiated and simultaneous exchange of an Exchange futures position for a corresponding OTC swap or other OTC instrument.

Exchange of Options for Options (“EOO”) – A privately negotiated and simultaneous exchange of an Exchange option position for a corresponding OTC option position or other OTC instrument with similar characteristics.

For purposes of this document, an EFP, EFR or EOO shall be referred to as an EFRP.

Parties to an EFRP

One party to the EFRP must be the buyer of (or the holder of the long market exposure associated with) the related position and the seller of the corresponding exchange contract. The other party to the EFRP must be the seller of (or the holder of the short market exposure associated with) the related position and the buyer of the corresponding Exchange contract.

Independently Controlled Accounts

The opposing accounts to an EFRP transaction must be (a) independently controlled accounts with different beneficial ownership; (b) independently controlled accounts of separate legal entities with common beneficial ownership; or (c) independently controlled accounts of the same legal entity, provided that the account controllers operate in separate business units.

For EFRP transactions between accounts with common beneficial ownership, the parties to the trade must be able to demonstrate the independent control of the accounts and that the transaction had economic substance for each party to the trade.

Related Positions

The related position must be the commodity underlying the exchange contract, or must be a derivative, by-product, or related product of such commodity that has a reasonable degree of price correlation to the commodity underlying the Exchange contract.

Each EFRP requires a bona-fide transfer of ownership of the underlying asset between the parties or a bona fide, legally binding contract between the parties consistent with relevant market conventions for the particular related position transaction.

Document Retention and Production

The documentation for the related position must be prepared and executed at the time of the EFRP transaction. The documentation must then be retained by the parties to the EFRP for a minimum of five years pursuant to CFTC Regulation 1.35. All documents relevant to the related position leg of the EFRP trade, the exchange leg of the EFRP trade, and payments must be provided upon request. Communications (e.g., emails, instant messages) related to the trade negotiation and execution must also be retained and provided upon request. **It is the responsibility of all participants, including brokers and customers, to retain and produce all documentation for the trade immediately upon request.**

Relevant documents for the related position leg of the EFRP trade are those customarily generated in accordance with cash market and/or other relevant market practices. Examples include:

- Commercial Contract
- Cash Confirmation
- OTC Contract
- Signed Swap Agreement
- Transfer of Ownership of the related position transaction
- Invoices
- Warehouse Receipts
- Bills of Sale
- Order tickets, trade blotters, emails, instant messages, etc. related to the order placement, execution, and/or confirmation of the EFRP
- Proof of payment (e.g. canceled checks, bank statements, Fed wire confirms, Fixed Income Clearing Corporation documents, bills of lading, etc.)
