Futures and options trading involve significant risk of loss and may not be suitable for everyone. Therefore, carefully consider whether such trading is suitable for you in light of your financial condition. The opinions and viewpoints expressed herein are limited to that of the individual author(s) as of a specified date. They are subject to change based on market conditions or other considerations. They do not constitute individualized recommendations or take into account the financial considerations or trading objectives of individual customers. This publication is intended to assist in your analysis and evaluation of the futures and options markets. However, any decisions to buy, sell or hold a futures or options position are entirely your own and should not in any way be deemed to be endorsed by ADM Investor Services, Inc. ("ADMIS"). Transactions in options carry a high degree of risk. Purchasers and seller of options should familiarize themselves with the type of option (i.e., put or call) which they contemplate trading and the associated risks. You should calculate the extent to which the value of the options must increase for your position to become profitable, taking into account the premium and all transaction costs. Spread strategies using combinations of positions, such as spread and straddle positions may be as risky as taking a simple long or short position. Actual results or performance may vary from those expressed or implied herein. Past performance does not guarantee future results. The opinions and viewpoints expressed herein are limited to that of the individual author(s) as of a specified date. They are subject to change based on market conditions or other considerations. They do not constitute individualized recommendations or take into account the financial considerations or trading objectives of individual customers. This publication is intended to assist in your analysis and evaluation of the futures and options markets. However, any decisions to buy, sell or hold a futures or options position are entirely your own and should not in any way deemed to be endorsed by ADM Investor Services, Inc. ("ADMIS"). Transactions in options carry a high degree of risk. Purchasers and seller of options should familiarize themselves with the type of option (i.e., put or call) which they contemplate trading and the associated risks. You should calculate the extent to which the value of the options must increase for your position to become profitable, taking into account the premium and all transaction costs. Spread strategies using combinations of positions, such as spread and straddle positions may be as risky as taking a simple long or short position.
