#### ADMIS.com | 312.242.7000 | Chicago | New York | London | Hong Kong | Singapore | Taipei | Shanghai

Live Heifer:	1315	\$109.11	20,274
Dressed Steer:	970	\$171.32	18,189
Dressed Heifer:	865	\$171.58	4,660

Beginning mid-December packers were pulling forward contracted and their own cattle that were scheduled for January deliveries. Cattle that should be scheduled for kill in January are being killed this week. Total US cattle weights are down because packers are pulling contracted cattle and their own cattle forward in South and Southwest. Thursday steers sold in Iowa/Minnesota averaging 1,539.8 pounds. Cattle in Texas were moving at 1336.5 pounds.

Normally, beef sales slow in January and the extra weight cattle in the North and Midwest are not going to help prices except if they pay premiums for cattle they want. Expect to see buyers discounting overfed cattle. Until big cattle are cleaned up, premiums could be paid for right weight cattle that may or may not be included in USDA prices, a cash grade premium. Packers are also indiscriminate how they are buying cattle in the South and Southwest. As long as cattle aren't too heavy, buyers pay the same for steers and heifers and Choice and Select.

### Feeder Cattle

THE CME FEEDER INDEX ON 12/25/2020 WAS 139.82 DOWN 17 FROM PREVIOUS DAY -

JANUARY 2021 FEEDER CATTLE FUTURES SETTLED ON DECEMBER 28, 2020 AT \$141.00

#### \_\_\_\_\_

WITH 9 PERCENT FEWER PLACEMENTS IT SEEMS AS THOUGH FEEDER CATTLE PRICES SHOULD BE HIGHER. HOWEVER, THE PLACEMENT GROUP WEIGHING 600 POUNDS OR LESS WAS THE LARGEST PLACEMENTS, 520,000 HEAD, FOLLOWED BY 460,000 HEAD WEIGHING 600 POUNDS TO 699 POUNDS. SO, THERE SHOULD BE PLENTY OF CATTLE TO KILL LATE FEBRUARY/ MARCH ESPECIALLY IF FEEDLOTS KEEP SELLING ON THE HEAVY SIDE, NOT OVERWEIGHT BUT HEAVY. CURRENTLY, FEEDER FUTURES HAVE FAIRLY NARROW SPREADS. MOVING FORWARD, FUTURES SHOULD WIDEN MORE THAN THERE ARE NOW. IF THIS IS THE CASE, USE WIDE SPREADS TO HEDGE.

#### \_\_\_\_\_

Looks like it was a good weekend for pork sales at least in the morning. All primals were up on early cutout Monday but does little to change 5 day average. Although there is little trade volume and open interest on the Pork Cutout futures, the reason 5 day composite pricing is used because it is how majority of pork is priced. The volatility of individual primal cuts is on small amounts of pork and packers and buyers don't share reasons for price volatility on minuscule amount of primal cuts plus prices vary on subprimal cuts.

Primal meat prices vary according to sub-primal cuts. There may be a buyer that needs Fresh Bone In shanks cuts, another that wants 20 to 23 pound trimmed select hams and another needs 20 to 23 pound boxes and each is priced differently. There are 47 various ham products. If a buyer wants the highest priced sub-primal cut and there are fewer buyers needing less expensive sub primals, there will be a jump in prices and later in the day there are more cheaper cuts sold and fewer high priced cuts sold, prices go down. There are 43 different ways loins are sold.

Watching individual pork primal cuts day to day will give false/ positive indicators. Trade the 5 day average and compare to previous week's change. If you give too much credence to individual cuts from one day to the next, it is like being on a teeter totter.
