Packers paid \$2 to \$4 more thus week Highest prices in the Midwest. Highest prices given to cattle with finish and weight. So far, packers buying a small amount from showlist. Are they going to pick up the buy? Are feedlots holding for more? The rest of the week will show if packers step up and buy more.

Boxed beef is dropping and not in small amounts. Rib, loin and chucks all dropped Wednesday morning. The spread between Choice rib and Select rib sections is just about \$145.00. The market shows buyers aren't going to pay up for Choice but they really don't want Select beef. The only primal doing ok are briskets and that's because barbeque restaurants are the fastest growing segment in the restaurant industry.

As of June 15, 2021 dressed steer and heifer weights were 856.3 compared to previous week at 861.6, down 5.3 pounds for the week. Grading percent was 81.8% down .9% compared to previous after dropping 1.9% the previous week.

Drop in grade shows cattle are current and are being bought for slaughter as soon as packer can take them.

Pork Index to the Lean Hog Index - Pork losing to hogs is negative for packers

Over the past couple of days, I have had at least a dozen calls about the spread between the CME Index and July futures. It isn't just the cash and July, there are quite a few spreads as I like to say, out of whack.

Is it normal to have a spread between the CME Lean Hog Index at \$120.73 and July 2021 Lean Hogs at \$104.52? Yes and No. As I have pointed out for several years, it is June 23,2021 and there is not a spot month until hogs are trading in July and actually to settlement when spot July 2021 goes off the board.

Was it normal when June Hogs went off the board on June 15th at \$122.87, and the very next day July 2021 Lean Hogs closed limit down at \$115.50 and the next day limit down to \$111.00. On June 16 the CME Hog Index was \$122.68.

Hogs are a speculators market right up to the day a contract month expires when there is a settlement off the CME Lean Hog Index.

ADMIS.com | 312.242.7000 | Chicago | New York | London | Hong Kong | Singapore | Taipei | Shanghai

Spreads over the past year move the way the big money pushes them. On June 1st August 2021 Lean Hogs settled \$23.07 over October 2021. On June 1st August closed \$32.70 over December 2021 Lean Hogs and on May 28th October 2021 settled \$9.90 over December 2021 Lean Hogs. Were any of these spreads normal? Far from it.

But then again, ask how actual prices are made. Below are the tables for June 22nd. The only open market negotiated prices were from 11.320 hogs and if you follow cash prices, 11.320 hogs is a fairly big number lately.
