Last week was sort of like pre-COVID times. Packers bought a few during the week but essentially waited until Friday to bring more money to buy cattle. Cattle in IA/MN sold mostly from \$130 to \$132 and cattle in the Southwest sold for \$130.00.

Boxed beef was up \$3.82 for the week and without enough high grading cattle, feedlots have some bargaining power.

Unless boxed beef prices turn down hard this week, feedlots will be asking for more and they likely will get it. Last year grain prices were beginning to move higher in the fall, but many feedlots had feed needs purchased at cheaper prices and they packed on pounds. Now with higher feed costs and high costs into the winter and spring, feedlots are wanting to move cattle as soon as they are ready and this includes contract feeders.

========

Last week the grading percent was down to 79.8% up .6% compared to previous week. US cattle grading 79.8% is low. Steer and heifer carcass weights were at 887.0 pound average.

NOVEMBER 02, 2021 dressed steer and heifer weights were 887.0 compared to previous week at 885.7 up 1.3 pounds. Grading percent was 79.8% up .6% compared to previous week at 79.2%.

It could be due to feedlots pushing less high cost grain or feedlots especially in the Southwest where packers are paying the same price for loads with just 35% Choice to Select to loads with 80% or more. The average grade of 79.2% shows why packers are paying a premium for Midwest cattle over Southwest cattle.

CORN GOES UP AND FEEDERS GO DOWN. CORN FALLS, FEEDERS MOVE HIGHER. IS IT THAT SIMPLE? LATELY IT HAS BEEN, BUT THERE ARE MANY TIMES WHEN FEEDERS GO UP OR DOWN REGARDLESS OF WHAT GRAINS DO.

FEEDER PRICES HAVE BEEN INCREASING THROUGHOUT 2021, BUT WITHOUT THE GRAIN PRODUCER/CATTLE FEEDER IN THE MIDWEST THAT IS SELLING CORN OVER FEEDING CATTLE, THE DEMAND ISN'T GOING TO BE AS STRONG.

GOING INTO 2022 THERE WILL BE FEWER FEEDERS AVAILBLE. CONTRACT FEEDLOTS AND PACKER OWNED FEEDLOTS WILL NEED FEEDER CATTLE TO FULFILL CONTRACTS.

Cash hogs are dropping and base prices for formula hogs are going down. Formula prices are also significant to what happens in months to come. Right now, it sure doesn't look good for hogs into the end of the year and into 2022.

Pork prices picked up last week. Price fluctuation on individual primals was like a yoyo especially hams, but the pork carcass on the 5 day average did improve by \$1.65. Year to date slaughter is down 2.0% for the year. Weights since September have been steadily creeping up which shows packers are killing the hogs they need to fill orders and not pushing lines hard.

Pork is cheap and it should keep demand at least steady through December. The biggest problem is how global hog numbers are increasing. Last week exports were very good, but with China an inconsistent buyer, it is hard to say from one week to the next if they will buy pork or go back to taking just offal, heads and feet. Mexico should remain a big buyer as demand increases into the end of the year.
