CATTLE ON FEED ESTIMATES

February cattle placements seen down 6% from last year -analysts - Reuters News March 14, 2023

	Range	Average	MIn head
On feed March 1	94.0-96.2	95.5	11.620
Placements in February	90.2-96.9	94.0	1.742
Marketings in February	95.0-96.0	95.6	1.745

The price of Choice Boxed as of March 16th isn't much different than it was the first of the year. However the price of Select has changed and demand has changed. On March 16th the Select Boxed Beef price was \$271.76, \$17.13 more than the first of the year. With the grade of cattle at 85.1% there are fewer Select cattle. The spread between Midwest and Southwest cash cattle is nearly the same. Also, the gains for Select beef for lower priced primals have seen big increases especially for briskets, short plates and flanks likely going to the grinder or for further processing. At the same time, the US is importing more beef and as pointed out earlier in the week, prices for certified lean beef (CBL) from Australia are going up. The US is exporting less beef and buyers come to the US for Choice/Prime beef and the US is importing more beef compared to January 2022. Beef imports are up 3.62% in 2023. In January 2023, Brazil became the largest beef exporter followed by Canada.

Dow Jones futures were higher Thursday bringing Live Cattle off Wednesday's lows. June Live Cattle closed up .30 cents. Technically, it was an inside day up and traded within Wednesday's range. For the week June is down \$1.77. On Thursday, June Cattle moved slightly above the 200 day moving average but failed to remain above it.

Cash prices are weaker this week. It appears packers have enough cattle to meet the needs to fill contracted beef orders and daily orders with slaughter at 123,000.

Remember, this is March and March is a lead month not a spot month. Funds are spread and derivative traders so in a non-spot month speculators take control. At the same time large speculators and funds have been moving out of April. First notice day for April Live Cattle isn't until April 10, 2023.

Exports were up for week ending March 9, 2024 Net export sales were 17,700 MT. South Korea took 5300, Japan 2300 MT Taiwan 2600 MT and China at 1600 MT. there were no big buyers. 17,700 MT is below the average week sales needed. Even with Brazil not exporting to China and some other countries, it didn't seem to help US exports

Week ending March 2, 2023 beef net sales were 5,600 MT. Week ending February 23, 2023 beef net sales were 8,100 MT. Week ending February 16, 2023 beef net sales were 15,400 MT. Week ending February 9, 2023, beef net sales were 28,100 MT.
