U.S. CATTLE ON FEED ESTIMATES IN YARDS WITH MORE THAN 1,000 CAPACITY

		AVERAGE	RANGE
		OF ESTIMATES	OF ESTIMATES
CATTLE ON FEED	May	96.5	95.5-97.1
PLACED DURING	April	96.3	91.8-99.6
MARKETED DURING	April	90.3	89.0-91.0

A year ago the April 2022 COF report estimates for placements were 92.2% and the actual COF report came out at 100%. For the May 2022 COF report placement estimates were 95.4% and the COF report came out at 99%. Both were above estimates. Slaughter has been slowly increasing. Could the On Feed and Placements be higher than the estimates similar to last year?

Choice Boxed Beef on Thursday was up 16 cents with gains on Chucks and Rounds but rib and Loin primals were down. The spread between Choice and Select beef continues to narrow which normally is negative for beef prices as consumers shy away from higher grading and more expensive cuts of beef in favor of lower graded beef. They are price shopping.

Live Cattle futures continue to move up narrowing the difference between higher priced cash cattle and lower Live Cattle futures as prices move to convergence in a little over two weeks.

Packers want cattle for slaughter but are limited in what cattle are available. Last week packers bought low numbers of cattle in Texas, New Mexico and Oklahoma but with weights and grades down, feedlots already selling at discounts to Midwestern cattle aren't going to sell with deeper discounts for low grades and light cattle. Even though prices are off their highs, current prices are high and selling light fed cattle and replacing with high priced feeders is a disadvantage for feedlots.

Brazil's livestock production in 2023 has increased the first quarter of 2023 compared to same period in 2022.

Cattle production was up 4.7% Pork production was up 3.5% Chicken production up 4.8%

Brazilian Institute of Geography and Statistics (IBGE)

BEEF NET EXPORTS FOR WEEK ENDING MAY 11, 2023 WERE 17,400 MT. There were no big buyers. Japan took 4600MT followed by South Korea at 3500 MT and China at 2900 MT Canada has been backing off in 2023 after signing a trade agreement in 2022 with Brazil.

Beef exports are increasing and US exports for beef cuts are usually Choice beef so there is some support for beef from the exports. It would help if there were at least one or two big buyers. But with increasing cattle into feedlots in Brazil and Brazil's total production up along with increased cattle production in Australia, even with a cheap US Dollar, it is going to be hard to see big exports ahead.

Week Ending May 4, 2023 16,100MT Week Ending April 27, 2023 20,100MT Week Ending April 20, 2023 9,500MT Week Ending April 13, 2023 19,100MT

The CME Lean Pork Index and the CME Lean Hog Index have been working up, but the Lean Hog index is going up faster than the Pork index. Packers aren't going to push slaughter. They will kill what they need for contracted pork orders and enough hogs to fill daily orders.

Pork prices are slowly moving up and compared to beef are cheap and an alternative purchase for protein. Movement on daily sales are light and it is the export market especially from Mexico that is supporting the market.

PORK NET EXPORT SALES WERE 31,900 MT FOR MAY 11, 2023, Mexico took half of the purchases at 15,500 MT China took 5200 MT followed by Japan at 2700 MT/
