USDA CATTLE ON FEED REPORT – MARCH 22, 2024

	Range	Average	Actual	Head	Est. Head
On feed March 1	100.5-101.3	100.9	101	11,838	11,755
Placements in February	104.5-108.8	106.4	110	1,890	1,849
Marketings in February	103-104.7	103.8	103	1,793	1,8

Cattle and calves on feed for the slaughter market in the United States for feedlots with capacity of 1,000 or more head totaled 11.8 million head on March 1, 2024. The inventory was 1 percent above March 1, 2023.

Placements in feedlots during February totaled 1.89 million head, 10 percent above 2023. Placements were the highest for February since the series began in 1996. Net placements were 1.83 million head. During February, placements of cattle and calves weighing less than 600 pounds were 360,000 head, 600-699 pounds were 330,000 head, 700-799 pounds were 515,000 head, 800-899 pounds were 485,000 head, 900-999 pounds were 150,000 head, and 1,000 pounds and greater were 50,000 head.

Marketings of fed cattle during February totaled 1.79 million head, 3 percent above 2023.

Other disappearance totaled 56,000 head during February, 3 percent below 2023

Traders were surprised with the larger than expect placements on Friday's COF report. Also, last week charts turned down and technical traders on Monday continued selling. Volume was active with June Live Cattle on Globex trading 35,315 contracts.

Slaughter last week fell below 600,000 head at 598,000, 3000 head less than last week, and 410,002 head less year to date. For the same time in 2023 year to date federal slaughter was down about 202,000 head and 2023 slaughter ended up about 1.4 million down.

Pork on the daily price sheet was up Monday on light sales with bellies up \$13.18.

Trade volume was light Monday with Globex June Lean Hog volume 17,607 contracts.

There are analysts estimating pork consumption in 2024 will add another pound. In 2023 US consumers added 1 pound of pork with largest gain for poultry up 4 pounds. If beef prices move down, it is likely so will pork.

USDA COLD STORAGE REPORT - MARCH 25, 2024

February 2024 Highlights

Total red meat supplies in freezers were down 4 percent from the previous month and down 13 percent from last year.

Total pounds of beef in freezers were down 6 percent from the previous month and down 12 percent from last year.

Frozen pork supplies were down 1 percent from the previous month and down 12 percent from last year.

Stocks of pork bellies were up 2 percent from last month but down 10 percent from last year.

Nothing in the report is going to surprise the cattle or hog markets Tuesday. It is good to see beef and pork are not being pushed into storage. Cattle prices have been strong because slaughter is down and boxed beef prices have been moving higher with good demand for all primal cuts. Unemployment is low and people in February were buying ground beef to the highest grade prime rib roasts and steaks. Cattle weights came into February down after the severe weather in January and the combination of fewer cattle and lower weights helped to put less beef in storage.

With cheap pork competing with high priced beef, pork sales in February saw a steady increase in demand. At the same time exports were good. Packer profit margins were also good and packers moved pork.

With Live Cattle down Monday, the Cold Storage report could reverse some of the negativity from the March 22nd COF report and the bigger placements.

April Lean Hogs are near enough in price to the CME Lean Hog Index so the Cold Storage report will have little effect. With June through August Lean Hogs already at big premiums to April, there shouldn't be much change because of the Cold Storage report. Also, the March 2024 Hogs and Pigs report will be released Thursday afternoon, March 28th. Traders will be waiting to see what it might say.

Once again, the Cold Storage report is news that is close to a month old. What is in storage on March 25th is going to be different than what was in storage a month in the past.
